OBJECTIVE

Aspiring Data Analyst with a strong academic foundation in Artificial Intelligence and Data Science, along with hands-on proficiency in Python, SQL, and Power BI. Skilled in data analysis, requirement interpretation, and validation testing. Seeking to apply analytical thinking and problem-solving abilities to support technology-driven solutions and enable data-informed business decisions.

EDUCATION

SNS College of Engineering

B.Tech in Artificial Intelligence And Data Science | CGPA: 8.42

Coimbatore, India

Oct 2022 - April 2026

Little Flower Convent Matric HR SEC School

PCM with Computer Science | Percentage: 80.83%

Tiruppur, India

May 2021 - May 2022

Little Flower Convent Matric HR SEC School

General Curriculum | Percentage: 69.8%

Tiruppur, India

May 2019 - May 2020

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Syncner

Coimbatore, India · Hybrid | July 2025 – Jan 2026

- Built End-to-End data pipelines for an AI-powered LMS product—designed schema, cleaned student datasets (10K+ records), and performed **EDA** to support ML model development.
- Analyzed student onboarding funnel and found only **40%** completed their first quiz within 3 days insights triggered redesign of welcome flow to boost early engagement.
- Estimated **TAM/SAM/SOM** for the ed-tech solution and quantified cost-saving potential through automation.
- Defined and tracked **KPIs** in Agile sprints, enabling data-driven iterations and cross-functional alignment.

TECHNICAL SKILLS

Coding & Analytics:	Python, SQL, Pandas, NumPy, Matplotlib, Power BI, Excel, EDA, KPI Tracking, Statistical Analysis (Basics), Model Validation (Exposure)
Software Development:	Flask, REST APIs (Basics), OOPS, Unit Testing, Test Data Creation
Databases & Tools:	Git, GitHub, VS Code, MySQL, PostgreSQL, n8n, Notion, Asana
Methods & Practices:	Agile, Scrum, SDLC, Technical and Functional Documentation, DBMS, Data Structures and Algorithms
Soft Skills:	Problem Solving, Design Thinking, Team Collaboration, Communication

PROJECTS

PDF Text Extractor | [Source Code](#)

/ Python, Streamlit, PyPDF2, PDFPlumber

- Automated extraction of text from unstructured **PDFs** into structured CSV/JSON reducing time by 70%.
- Built an intuitive drag-and-drop UI in Streamlit, enabling non-technical users to validate and export clean data.

Signal Miner – Hiring Trend Analysis | [Source Code](#)

Python, Pandas, Matplotlib

- Scraped and analyzed 500+ LinkedIn job postings to track real-time hiring demand across AI/tech roles in startups.
- Visualized trends in skill requirements and role growth, revealing a 40% MoM increase in "AI Analyst" roles—insight

Agentic AI for Brand-Influencer Analysis | [Source Code](#)

n8n, Python, Google Gemini API

- Built an agentic AI workflow in n8n using the Gemini API to automatically match brands with relevant influencers.
- Automated discovery, scoring, and metric-based recommendations—streamlining influencer selection.

To-Do List Application | [Source Code](#)

Flask, Python, MySQL

- Built a local full-stack task manager with Flask and MySQL, replacing handwritten notes with structured, searchable task tracking. Implemented CRUD functionality with direct database integration for reliable storage and task lifecycle control.

CERTIFICATIONS
